

POE CABLE

QUALITY

STANDARD , POE STANDARD

RJ45 ETHELET OD: 4.0mm

DC CABLE OD: 3.0mm

CORE NUMBER: 6 CORES

DC Female head port: 5.5*2.1cm

DC male head port: 5.5*2.1cm

RJ45 Female head port: 8P8C

RJ45 male head port: 8P8C

MATERIAL: COPPER

Note: power supply 45 feet (+), 78 feet (1236) (-) + data

USE This kind of POE power supply cable is suitable for Ethernet, network IP phone with network video, AP, bridge, POE suits the network switch. POE separation line with POE separator two products can form a complete set, make the machine equipment better use!

Advantages

- 1.It is mainly used for 100 base-t and 10 base-t network
- 2.Crystal is adopted into a type of protection, the product is more durable
- 3.Small diameter, save the space occupied
- 4.The weight is light, flexible, easy to install
- 5.Has the independence and flexibility, is suitable for the structured cabling system

COLOR

BLACK

Passive POE Splitter for Surveillance Systems. Useful in video signal transmission, and power on the same UTP cable. This eliminates the need to install an additional power cable besides the UTP. It is recommended to take into account the voltage losses recorded on the cable at long lengths (over 15 m), and to compensate from sources with adjustable output voltage. UTP cable quality / shielding / section is a factor that affects / improves data and feed transmissions.
